

Student and Parent/Guardian Agreement for Use of MyTech Device and Network Resources

This agreement is between Denver Public Schools, in the city and county of Denver, in the state of Colorado and:

Student Name

Student Number

Parent Name

School Name

As part of the MyTech program and to give students access to online resources both in class and at home, students at MyTech schools are assigned a device and/or network resource provided by DPS. It is intended that the student will carry this device(s) with him/her for use at school and at home.

In consideration of the use of the device and network resources at home, parent and student agree that:

1. The student will use the device according to instructors' guidance while outside of school.
2. Parent acknowledges that while the District makes every effort to ensure the security of the device, students may be able to access unsecured and unfiltered networks outside of the control of Denver Public Schools. Responsible use of network resources is the sole responsibility of the student and parent.
3. The parent and student will be personally responsible for any intentional or unintentional damage to or loss of the computing device while in the student's care - on or off of school property. The cost of this repair or replacement will be offset by the MyTech fee. (See fee table below and the MyTech Handbook for details – <http://MyTech.dpsk12.org>)

MyTech Fee Structure				
MyTech Fee*		Damage		Loss
		Chromebook	Chromebook	Charger, Case, or Hot Spot
\$20 (annual)	1st Incident**	\$25	\$50	\$20
	Following Incidents	\$25	\$250	\$20

*Annual non-refundable fee offsets replacement, repair, and service of devices. Students may be eligible for a fee waiver based on Free or Reduced Lunch status.
**On first incident, schools may charge the student a higher fee if there is indication that damage or loss was intentional or notably negligent.

4. The parent and student will return the device and network resources upon request in the same condition as it was received, taking into account normal wear and use.
5. The parent and student have read the DPS MyTech Handbook and will care for the device and network resources as described therein.
6. Device and network resources are property of Denver Public Schools as is any installed software. As such, the district can monitor its use remotely and any violations of Denver Public Schools' policy can result in discipline in line with district policy.
7. Device may be erased as part of maintenance or repair. Backup of student-owned data is solely the responsibility of the student and neither the school nor the district is responsible for loss of stored files, music, video or software.
8. Students will keep the device and network resources clean and in proper working condition. Student will notify a school representative immediately if the device does not work as expected or shows unusual wear.
9. Any text, imagery, or audio that is illegal according to local, state, or federal law (e.g., threats, hate speech, obscene or sexual images or text) will be immediately reported to the appropriate law enforcement agency.
10. The parent and student will comply with all additional terms and conditions set forth in any Addenda included in the Hot Spot Use Agreement, as applicable. Such Addenda will be enforced by DPS.

It is understood that the intentional failure to return the computing device to the school under some circumstances may constitute theft of district property. Any theft of district property, including the reported sale or transfer of the device for profit will be reported to the district attorney for prosecution. This agreement ends on the last day of the present school year, upon the student's withdrawal from current school, or upon the request of the school principal or other school representative, whichever occurs first and when the device is returned in good working order or replacement fees paid.
